## 2- and 3-port valves with **V..F63..** flanged connections, PN 40

From the large-stroke valve line

- High-performance valves for medium temperatures from -25...220 °C
- Valve body of cast steel GP240GH
- DN 15...150
- $k_{vs}$  0.2...315 m<sup>3</sup>/h
- Flange type 21, flange design B
- VVF63..K with pressure compensation to handle high differential pressure
- Equipable with electro-hydraulic actuators SKD., SKB., SKC..

### Use

In boiler, district heating and refrigeration plants, cooling towers, heating groups, and in air handling units as control or shutoff valves.

For use in closed or open hydraulic circuits (observe cavitation).

DN = Nominal size

k<sub>vs</sub> = Flow nominal value of cold water (5...30 °C) through the fully opened valve (H<sub>100</sub>) at a differential pressure of 100 kPa (1 bar)

S<sub>v</sub> = Rangeability

Δp<sub>s</sub> = Maximum permissible differential pressure at which the motorized valve still closes securely against the pressure

Δp<sub>max</sub> = Maximum permissible differential pressure across the valve's throughport for the entire positioning range of the motorized valve

## Ordering

---

### Example

Product number	Stock number	Description
VXF63.32-16	S55210-V137	3-port valve with flange, PN 40, DN32

### Delivery

Valves, actuators and accessories are packed and delivered as separate items.

### Note

Counter-flanges, bolts and gaskets must be provided on site.

<ul style="list-style-type: none"><li>• Basic documentation</li></ul>	P4030	Contains background information and technical basic knowledge of valves

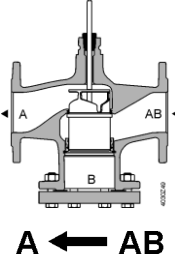

The illustrations below show the basic design of the valves. Constructional features, such as the shape of plugs, may differ.

2-port valves

2-port valves  
pressure compensated

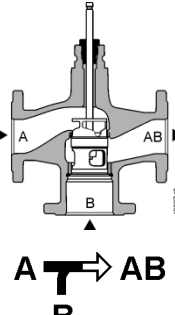

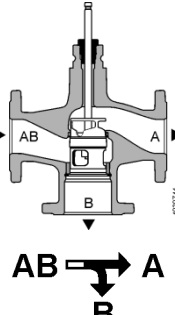

The VVF63..K valves use a pressure-compensated plug. This enables the same type of actuators to be used for the control of volumetric flow at higher differential pressures.

## Engineering notes

Mounting location	Preferably mount the valves at the return, as the temperature is lower there and the strain on the stem sealing gland is lower.
Dirt trap	Mount a dirt filter or dirt trap before the valve to ensure proper functioning, and a long service life of the valve. Remove dirt, welding beads, etc. from the valves and pipes.
Cavitation	Cavitation can be avoided by limiting the pressure differential across the valve depending on the medium temperature and the prepressure.

## Mounting notes

---

Mounting position

Mounting positions apply to both 2- and 3-port valves.

## Commissioning notes

---

**The valve may be put into operation only if actuator and valve are correctly assembled.**

Note

Ensure that actuator stem and valve stem are rigidly connected in all positions.

Function check

Valve	Throughport A→AB or AB→A	Bypass B→AB
Valve stem extends	Closes	Opens
Valve stem retracts	Opens	Closes

## Maintenance notes

---

The valves are maintenance-free.

When servicing valves or actuators:

- Deactivate the pump and turn off the power supply
- Close the shutoff valves
- Fully reduce the pressure in the piping system and allow pipes to completely cool down

If necessary, disconnect the electrical wires.

Disposal

Do not dispose of the device as unsorted municipal waste.

- Special handling of individual components may be mandated by law or make ecological sense.
- Observe all local and currently applicable laws and regulations.

## Warranty

---

Application-related technical data are guaranteed only when the valves are used in connection with the Siemens actuators listed under "Equipment combinations", page 3.

When used with actuators of other manufacture, any warranty by Siemens becomes void.

- <sup>1)</sup> For certain valve lines and high  $k_{vS}$  values, the valve characteristic is optimized for maximum volumetric flow  $k_{V100}$
- <sup>2)</sup> With SKD.: Usable up to a max. medium temperature of 150 °C  
For medium temperatures < -5 °C, the stem sealing gland must be replaced, please see page 4.
- <sup>3)</sup> Valves where  $PS \times DN < 1000$ , do not require special testing and cannot carry the CE label.
